Today the installed capacity of power plants (PP) of the company exceeds 12.3 mln. kW. It comprises hydro power plants (HPP) - 11.5% and thermal power plants (TPP) - 86%. 2.5 % of power plants are out of jurisdiction of SJSC "Uzbekenergo".

The big TPPs, such as Syr-Darya TPP with the capacity of 3000MW, Tashkent TPP with the capacity of 1860 MW, Novo-Angren TPP with the capacity of 2100MW and Navoi TPP with the capacity of 1250 MW constitute the basis of National Power System.

Hydropower sector includes 28 HPPs united into 5 cascades. The big HPPs are Charvak HPP with the capacity of 600 MW and Khodjikent HPP with the capacity of 165 MW.

Total extension of power transmission lines is nearly 237 thousand km, including 7500 km of high voltage lines by 220 kV and 500 kV.

The technical re-equipment and reconstruction of power plants and networks, development of demonopolization process, privatization and corporatization of power industry enterprises are the main strategic goals for the short-term and middle-term periods.
